# Using McGill LandscapeMix Grow Better with Less!

## LANDSCAPING

**Native Soil Garden/ Vegetable Beds:** Apply a 1-2" layer to soil and incorporate to a 4-6" depth. Condition soil this way every 1-2 years, or as recommended per soil test analysis.

**Raised Garden/Vegetable Beds:** Apply compost with 25%-50% native soil to provide structure for planting. Water thoroughly and reapply each year, or as per soil test recommendations.

**Trees & Shrubs:** Dig a hole the same depth as root ball and at least 2-3 times as wide. Mix 1-part compost with 2 or 3 parts of soil obtained from the planting hole. Place the tree or shrub in the planting hole and apply amended soil around the root ball. Firm the backfilled soil & water.

## TURFGRASS

**New Lawns:** Apply a 1-2" layer of McGill LandscapeMix Premium Compost to soil and incorporate to a 4-6" depth. Apply seed or sod, then rake and water.

**Topdressing:** Core aerate the turf making 4-5 passes over the area to be topdressed, then apply a 1/8" to 1/2" layer of McGill LandscapeMix Premium Compost using standard topdressing equipment, or apply by hand. Rake or back-drag the compost into the turf canopy and core holes. Seed, if necessary, and water.

**Topsoil Manufacturing/Upgrading:** Mix 1-part compost with 2-3 parts existing or purchased soil, blend uniformly. Specific application rate depends on soil quality and planted vegetation. McGill LandscapeMix is a blend of McGill SoilBuilder Premium Compost and composted amendments, creating the pe

McGill makes no representation or warranty, express or implied, concerning the product, the results to be obtained from the use of this product, and/or generally accepted application procedures and precautions, including no implied warranty of merchantability or fitness for a particular purpose or factors beyond McGill's reasonable control.
