

# Transforming Waste... Rebuilding Soils®

McGill Environmental Systems appreciates the support they have received from Charleston County's residents and continues our commitment to providing a consistent supply of high-quality STA Certified compost for the Charleston County market.

Beginning January 1<sup>st</sup>, 2021, we will discontinue residential **bulk** pick up at the Bees Ferry location. McGill is committed to supporting local retailers and have partnered with local businesses to stock Bees Best Charleston Compost for residential pick up and deliveries.

This change will provide us the opportunity to focus on producing high-quality compost and ensure the safety of our staff and county residents.

To locate a local Bees Best Charleston Compost retailer visit:
