

SoilBuilder®

Premium Compost

Recommended Applications

McGill SoilBuilder® premium compost is a truly versatile product designed to meet a range of needs. Use as a beneficial soil amendment for top-dressing lawns and incorporating in gardens.

Also, as an important component in soil blends and for manufacturing enriched topsoils on site.

Recommended areas of use include:

- Landscaping, gardening, erosion control, and stormwater
- Turfgrass (seed and sod) and sports turf
- Nursery applications like soil blends and container mixes
- Biofiltration and bioremediation (e.g. constructed wetlands/ landfill cover)

Application	Amount
Topdressing	Distribute 1/8 - 1/2 inch of McGill SoilBuilder Optimal results when combined with core aeration and overseeding, if needed.
Soil Amendment	1-2 inches of McGill SoilBuilder incorporated to a depth of 4-8 inches of existing soil
Blends and Mixes	Up to 25% McGill SoilBuilder
Topsoil	Mix 1 part McGill SoilBuilder with 2-3 parts native soil and blend

*Always base your application rate on soil tests and compost analysis.

Versatile Premium Compost for Healthy Soil

McGill SoilBuilder® is a premium product ideal for use as a topdressing, soil amendment, or mix ingredient.

Manufactured from 100% composted biodegradable materials, our quality compost has a rich dark color, a loose even texture with no unprocessed chunks of wood or bark. With optimal moisture content – not too dry, not too wet – using McGill SoilBuilder will provide the results your project deserves.

The McGill Advantage...

McGill SoilBuilder® Premium Compost is manufactured in our indoor, computer-controlled facilities. Optimal conditions result in a superior high performing consistent premium compost.

McGill has scientifically enhanced nature's own process and our compost delivers:

- Higher yields with less synthetic chemicals.**
Create healthier soil structure and increase organic matter content, providing beneficial microbes for key soil processes.
- More water where you need it.**
Improve growing conditions by boosting the water-holding capacity of your soil and keeping more moisture at the root zone.
- Improved drainage**
Reduce water-logging after heavy rain or overwatering through increased pore space, allowing water to percolate more quickly.
- Slow release**
Provide more nutrients to the root zone and hold them there for slow release through high Cation Exchange Capacity (CEC).
- Reliable performance**
Providing year-round supply and consistent results due to our climate-controlled, sustainable processing.

Premium Compost for Consistently Premium Results

McGill's 365/24/7 computer-controlled processing delivers a uniform and consistent product for predictable results every time, and our high production volumes mean we can meet the quantity requirements of your biggest jobs any time of the year.

The Seal of Testing Assurance (STA) symbol is your assurance that our compost has been tested and certified in accordance with the US Composting Council's (USCC) STA program.

McGill Soil**Builder**® premium compost is tested monthly to maintain its STA certification. Contact your sales representative for the latest report and to learn how each parameter affects compost quality, along with application suggestions based on your soil's current condition.

McGill Soil**Builder**® premium compost meets all three compost use classifications of the US Composting Council's Consumer Use Program for Seal of Testing Assurance certified products.
