

# Transforming Waste... Rebuilding Soils

# SoilBuilder®

Premium Compost

**Use SoilBuilder on:**  
**Trees & Shrubs, Lawns,**  
**Flower & Vegetable Gardens**

McGill SoilBuilder rebuilds poor soil by increasing organic matter, replenishing the soil microbes responsible for nutrient uptake and improving water management.

Manufactured from 100% recycled content, McGill SoilBuilder is a product you can feel good about - makes lawns, gardens and ornamentals look great while helping the planet.

**Give your soil what  
it really wants!**

**Save Money • Save Water  
Save the Planet**

# Using McGill SoilBuilder

## Grow Better with Less!

**Fruits, vegetables, ornamentals:** For raised beds blend up to 25% **SoilBuilder** with 75% or more native soils. Use 1 to 2 inches of **SoilBuilder** in native soil beds and incorporate to a depth of 6 to 8 inches, plant and water. Condition this way every other year.

**Trees, shrubs:** Dig a hole the same depth as the root ball and two to three times as wide. Mix up to 25% **SoilBuilder** with 75% soil saved from the planting hole. Place the plant in the planting hole and apply amended soil around the root ball. Firm the soil as the hole is backfilled and water thoroughly.

**New turf areas:** Apply 1 to 2 inches of **SoilBuilder** to existing soil and incorporate to a depth of 6 to 8 inches. Apply seed or install sod; rake and water.

**Topsoil manufacturing / upgrading:** Mix 1 part **SoilBuilder** with 3 to 4 parts soil and blend.

**Turf topdressing:** Core-aerate turf making 4 to 5 passes over the area to be top-dressed. Apply  $\frac{1}{4}$ " to  $\frac{1}{2}$ " of **SoilBuilder** to the turf surface using standard topdressing equipment, or apply by hand. Rake or back-drag **SoilBuilder** into the turf canopy and core holes. Seed (if needed) and water.

**Coverage: 1 cubic yard will cover...**

Sq. ft. covered	Approx. depth
1296	1/4 inch
648	1/2 inch
324	1 inch
162	2 inches

**134 cubic yards cover 1 acre at 1 inch depth**
